NOTE: *The percentage of benefit to low/ moderate income households is calculated on the total number of households in the service area – not just those households surveyed. Vacant properties ARE NOT to be included in the service area, but need to be identified on the map.*

However, since the National Objective of low/moderate income benefit is based on persons, not households, ACED will convert all households in the service area to total persons in order to determine eligibility.

NOTE: *A project will be re-evaluated for eligibility if there are any deviation(s) from the submitted application’s scope of work or project location(s).*
